PROFILE

I am a Learning Support specialist with 15 years of experience across national and international school settings, supporting learners from primary through to secondary transition — covering the full school range. I work alongside classroom teachers to ensure every student can access, engage with, and make progress in their learning. My practice integrates Universal Design for Learning, collaborative co-teaching, and purposeful individual planning — grounded in research and shaped by real classroom relationships.

LEARNING SUPPORT PHILOSOPHY

Where learning environments designed for all meet attentive, personalised support for each — inclusive education blossoms into culture. That intersection — inside the classroom and beyond — is what I hope to build, together.

MY APPROACH

How I Support Learners

01

DESIGN FOR ACCESS

I apply Universal Design for Learning (UDL) principles to ensure that instructional materials, tasks, and assessments are accessible to all learners before barriers arise — not as an afterthought.

02

COLLABORATE TO INCLUDE

Effective inclusion happens through teacher partnership. I work alongside subject teachers to co-plan lessons, adapt curriculum, modify assessments, and deliver in-class support through co-teaching.

03

PERSONALISE WITH PURPOSE

I develop and implement Individual Learning Plans (ILPs) aligned with classroom objectives, monitor student progress through formative assessment, and adjust strategies to meet each learner's evolving needs.

IN PRACTICE

What I Actually Do

CO-TEACHING & IN-CLASS SUPPORT

Inside and Beyond the Classroom

I work flexibly across push-in and pull-out models — co-teaching alongside subject teachers in the classroom, or providing targeted small-group support in a separate space, depending on what each student and situation needs.

ILP DEVELOPMENT & MONITORING

Individualised Support that Connects to Class

I develop Individual Learning Plans grounded in classroom objectives, not isolated from them. Plans are communicated to all subject teachers and reviewed regularly, ensuring support is consistent, purposeful, and evidence-informed.

FAMILY & STAKEHOLDER COMMUNICATION

Understanding the Learner Together

I maintain regular communication with families, counsellors, colleagues, and external specialists to build a complete and shared understanding of each learner — ensuring that support is coherent across school and home contexts.

COLLABORATIVE PLANNING

Designing Inclusive Units Together

I work with classroom teachers during unit planning to embed differentiation and access strategies from the outset — modifying assessments, creating tiered tasks, and aligning support with broader skill development goals.

ASSESSMENT ACCOMMODATION

Ensuring Fair Access to Assessment

I coordinate assessment accommodations across all subjects — extended time, modified format, and assistive technology provision — ensuring students can demonstrate their understanding without being disadvantaged by their learning barriers.

TEACHER CAPACITY BUILDING

Growing Together with Teachers

I see teacher development as core to my role. I share strategies, model inclusive practices, and build shared language around differentiation and access — so that inclusive practice becomes embedded in school culture, not dependent on a single LS specialist.

Learning Support Across Grade Levels

ELEMENTARY · GRADE 3

Improving Task Engagement and Independent Completion

BARRIER IDENTIFIED

Executive function challenges affecting task organisation and sustained attention, resulting in low task completion and disengagement.

SUPPORT STRATEGY

Implemented structured scaffolding during whole-class instruction with the classroom teacher — step-by-step task breakdown, self-monitoring checklists, visual task sequencing, and scheduled check-in points.

OUTCOME

Over 8 weeks, task completion increased from ~50% to 80%. Improved engagement and independence, with reduced adult prompting. Improvements were sustained and generalised across classroom contexts. *"Having a checklist made it easier to know what to do next."*

MIDDLE SCHOOL · GRADE 7

Improving Reading Comprehension and Academic Engagement

BARRIER IDENTIFIED

Limited vocabulary knowledge and underdeveloped reading strategies affecting identification of key ideas and access to subject content, leading to reduced engagement and delayed task completion.

SUPPORT STRATEGY

Targeted vocabulary pre-teaching and explicit instruction in reading strategies (prediction, summarisation, question generation). Structured graphic organisers embedded within subject lessons through teacher collaboration.

OUTCOME

Over 10 weeks, improved ability to identify and summarise key ideas, with increased class discussion participation. Task completion time decreased; student independently applied strategies across subjects. *"It was like having a map before I started reading."*

HIGH SCHOOL · GRADE 11

Improving Essay Writing and Independent Learning

BARRIER IDENTIFIED

Limited understanding of essay structure and underdeveloped self-regulated learning skills — planning, time management, and revision — resulting in frequent submission delays.

SUPPORT STRATEGY

Explicit instruction in essay structure and argument development with paragraph frames. Milestone-based task management (draft, feedback, revision), aligned with assessment criteria through subject teacher collaboration.

OUTCOME

Over 12 weeks, submission delays significantly reduced; improved organisation and clarity in written work. Increased independence in planning, drafting, and revising. *"I could see what I needed to do at each stage."*

SKILLS & COMPETENCIES

What I Bring to the Role

LEARNING SUPPORT PRACTICE

- Differentiated Instruction & Instructional Adaptation
- Universal Design for Learning (UDL) Implementation
- Individual Learning Plan (ILP) Development & Monitoring
- In-Class Support & Co-Teaching
- Assessment Accommodation & Modification
- Formative Assessment & Progress Monitoring
- Positive Behavior Support (PBS)

RESEARCH & EVIDENCE-BASED PRACTICE

- Learning Design & Instructional Systems Thinking
- Educational Research & Data-Informed Practice
- Curriculum Development & Programme Design
- ML · XAI Application in Educational Contexts

COLLABORATION & SCHOOL COMMUNITY

- Collaborative Planning with Subject Teachers
- Cross-departmental Inclusive Practice
- Family Communication & Partnership
- Liaison with External Specialists
- Teacher Capacity Building & Coaching
- School-wide Student Support System Design

CREDENTIALS

- 15 Years Teaching — National & International Settings
- Special Education Teacher Certificate, GR 1 (Highest)
- M.Ed. Educational Technology & Instructional System Design
- Korean Language Teacher License, LV 2

INCLUSIVE PRACTICE

How I Embed Inclusion in School

LEARNING SKILLS SUPPORT

I embed learning skills development into support plans — helping students build the self-management, communication, and thinking skills they need to thrive independently.

WHOLE-LEARNER APPROACH

I design support that nurtures the whole learner — helping students become more reflective, open-minded, and resilient through structured, scaffolded experiences.

COLLABORATIVE UNIT PLANNING

I collaborate with teachers during unit planning to ensure differentiation is built in from the start — adapting assessment criteria, scaffolding inquiry tasks, and ensuring access to core concepts.

INQUIRY & ACCESS

I adapt inquiry-based tasks to ensure students with diverse needs can access and contribute — through modified entry points, visual scaffolds, and tiered questioning.

ASSESSMENT ACCESS & INCLUSION

I coordinate assessment access arrangements across subjects and support students to manage the academic demands of secondary school alongside their individual learning needs.

WHOLE-SCHOOL INCLUSION

I work beyond the individual to build inclusive school culture — sharing strategies school-wide, deepening a shared understanding of inclusion, and supporting all teachers to feel confident and equipped.
